Jeremy Topaka

UX Engineer & Product Founder

Atlanta, GA | **Email:** jeremytopaka@gmail.com | **Phone:** (470) 364-8738 **Portfolio:** https://jeremytopaka.web.app/ | **DriverRoom:** https://driverroom.dev/ | **EliteReply:** https://elitereply.info/

PROFESSIONAL SUMMARY: AI ARTISAN & FULL-STACK PROBLEM SOLVER

A highly accomplished, self-directed developer and **UX Engineer** specializing in full-cycle mobile application development. Leveraging a **16+ year background in high art and visual design**, I operate as an **AI Artisan**—using AI for product conceptualization, followed by rigorous, detailed technical execution.

I have successfully designed, built, and launched **two commercial, live-in-market applications** from scratch using the **React Native/Firebase** stack, demonstrating mastery over the entire product lifecycle: from secure transactional logic and design to **DNS configuration** and cloud deployment.

PRODUCT PORTFOLIO & PROFESSIONAL EXPERIENCE

1. DriverRoom (B2B Fleet & Logistics Management Application)

Sole Founder, Developer, UI/UX Designer

- **Impact:** Designed and deployed a mission-critical tool that provides a centralized gate code database, directly **reducing fleet gate-entry delays** for logistics companies.
- **Architecture:** Engineered a secure, multi-level user system (Manager/Driver) featuring dedicated access roles, authentication, and data modeling using **Firebase Firestore**.
- **Infrastructure:** Established the full operational ecosystem, including development in **VS Code**, deployment via **EAS**, and personally handling **DNS configuration and domain management** for the live web presence (DriverRoom.dev).

2. EliteReply (B2C Global E-commerce Marketplace)

Sole Founder, Developer, UI/UX Designer

- **Market Solution:** Created a functional global e-commerce platform that facilitates sales and local appointments for African businesses, serving a global diaspora.
- **Critical Implementation:** Successfully handled the detailed coding and integration of **transactional payment gateway options**, a high-stakes requirement for any commercial B2C marketplace.
- **Creative Execution:** Applied a **high art spirit** to the UI/UX design, ensuring a visually superior and intuitive interface that handles complex e-commerce and booking flows.
- **Infrastructure:** Established the full operational ecosystem, including development in **VS**

Code, deployment via **EAS**, and personally handling **DNS configuration and domain management** for the live web presence (EliteReply.info).

🛠️ TECHNICAL TOOLKIT & PROFICIENCIES

Category	Skills and Technologies
Front-End & Mobile	**React Native, JavaScript** (ES6+), Mobile-First Design, VS Code, Expo.
UX & Design	**UI/UX Design, Visual Arts/Aesthetics, Figma/Prototyping, AI-Aided Conceptualization.**
Backend & Data	**Firebase** (Firestore, Authentication), Data Modeling, API Integration, Complex B2B/B2C Logic.
Deployment & Ops	**EAS (Expo Application Services), DNS Configuration, Domain Management**, App Store/Play Store Deployment, Git/GitHub.

PROFESSIONAL FOCUS

- **Self-Directed Mastery in Software Product Engineering:** Practical expertise validated by the successful, solo development, launch, and continuous maintenance of two commercial, live-in-market mobile applications.
